

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the specification as follows:

Page 8, please substitute the paragraph beginning at line 18 with the following paragraph:

As shown in Fig. 2, the second heat sink 3 is fitted to the first heat sink 2 such that an electronic-component mounted surface 5 of the second heat sink 3 is flush with the surface of the first heat sink 2. An entire peripheral portion of the second heat sink 3 in the vicinity of a boundary between the fitted heat sinks is pressed so as to bring the two heat sinks into an integral structure by plastic flow bonding.
